# InspireData™ Learn to Use: Plots

## Add Summary Computations to a Plot

1. Click the **Compute** button  on the **Toolbar**.
2. Click the **Operation** button  on the **Toolbar** and choose an operation to use.
3. If a set of question marks (??) is on the workspace, click the **Field** button  on the **Toolbar** and choose a numerical field for which to compute summary data.

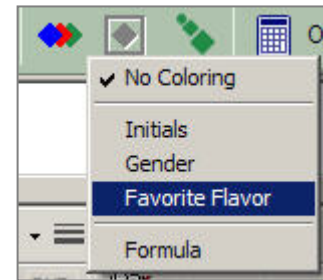

## Add Labels to a Plot

1. Click the **Label** button  on the **Toolbar** to turn labels on; by default icons are labeled with the first field in the table.
2. To change the default label, click the **Label Options** button  and choose another field or define a formula to label.

## Add Color to a Plot

1. Click the **Color by field** button  on the **Toolbar** and choose a field or define a formula to color the icons.
2. InspireData automatically assigns colors to the chosen field. To change the default colors, click on the color square next to the value's name in the legend that is displayed on the plot.

## Add Titles to a Plot

1. Choose **Plot Title** from the **Plot** menu.
2. Type an appropriate title into the dialog box and then click the **Accept** button .
3. To change, edit or remove a title; click on the title and the title dialog box will open.
