## Learn to Use: Venn Diagrams

### Create a Venn diagram

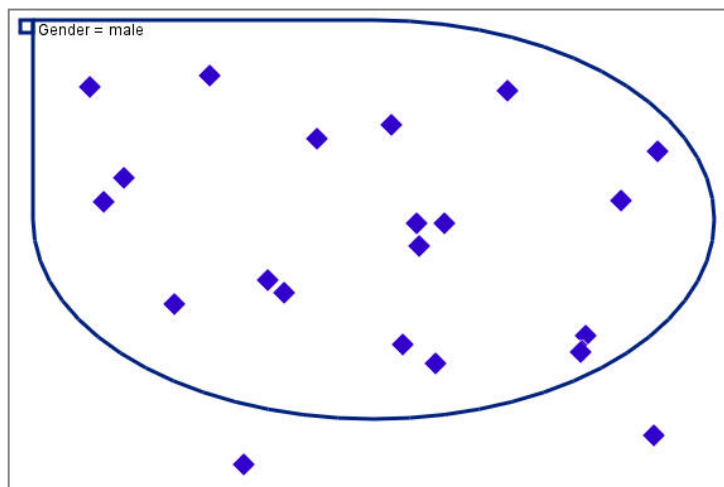

1. In **Plot View**, click the **Venn Plot** button  on the **Toolbar**.
2. An undefined Venn loop appears. The equation **Field =?** appears in the corner of the loop.
3. Click **Field** and choose a field to assign to the loop.

4. Click the **equals sign (=)** and choose an operator.
5. Click the **question mark (?)** and choose a value to include or exclude.

6. Icons that meet the criteria move into the Venn loop, those that do not move out.

## Add another loop to a Venn diagram

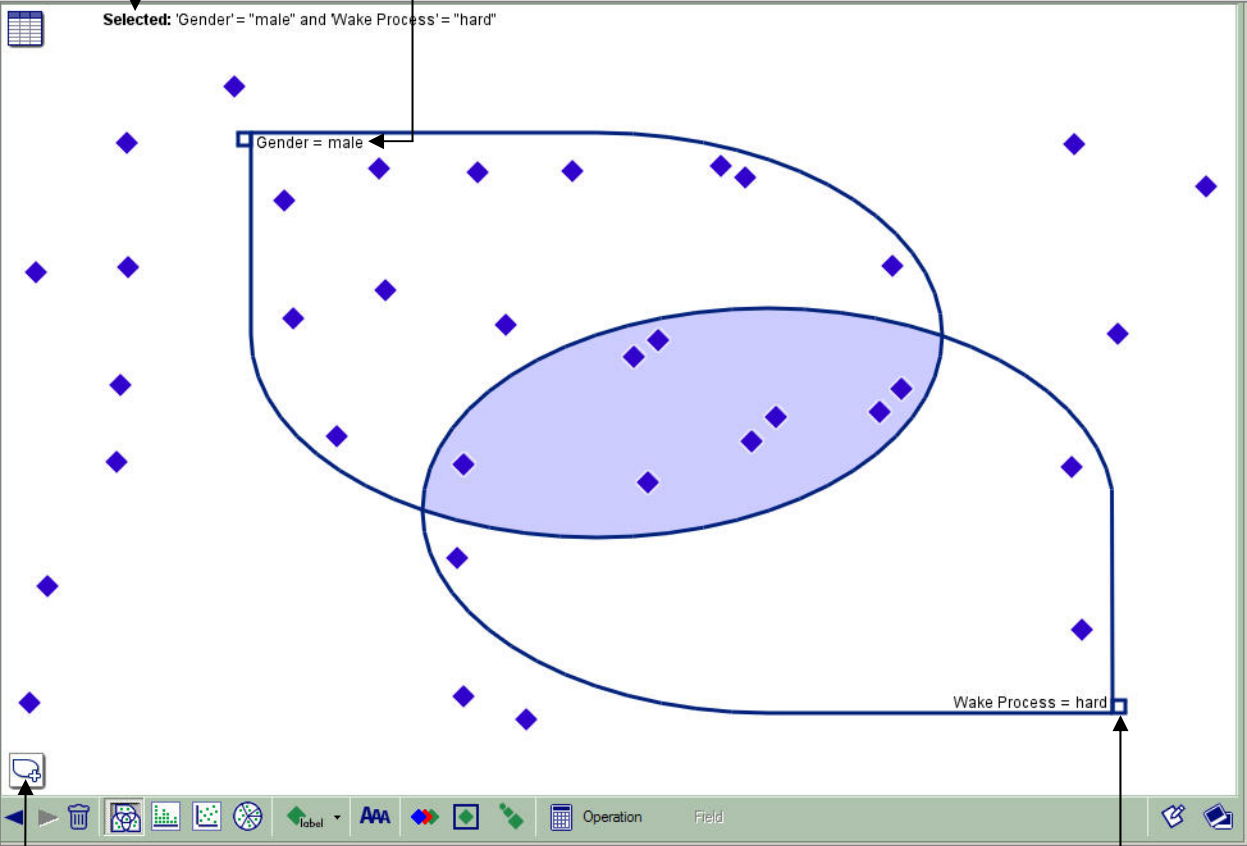

1. Click the **Add Venn Loop** button .
2. Set the parameters for the new Venn loop. Up to three Venn loops can be added.

Specify loop constraint:

- Select a field
- Select a comparison (=, >, etc.)
- Specify a cutoff or comparison value

Identifies selected region

Selected: 'Gender' = "male" and 'Wake Process' = "hard"

Gender = male

Wake Process = hard

Click to add another loop to the Venn diagram

Click to close loop
